

A complete poultry management and control system

- Easy to use
- Color touch screen
- Suitable for all types of ventilation systems
- Built in temperature reduction and minimum ventilation curves

Image II

*When we are comfortable,
you can sleep well!*

- Agro vent minimum ventilation
- Tunnel ventilation
- Inlet control
- Cool curtain control
- Cooling
- Static pressure control
- Alarm
- Light control
- Dusk dawn control
- Water control
- Feed control
- Automatic temperature reduction curve
- Automatic minimum ventilation curve
- Data logging of growing period
- Silo weighing
- Water counting
- Temperature
- Humidity
- Mortality
- CO₂ Sensor

- Easy to read
- Color touch screen
- Multi language
- Graphic data collection
- Icon control Operating System

Water meter

Static pressure sensor

CO₂ sensor

Temperature sensors

Humidity sensor

Bird weigher

Silo weigher

- *ChickPro software PC management and monitoring allows central remote control of the entire farm*
- *Easy up and download of information to a USB memory stick*

Complete tunnel ventilation control

Technical Specification

- *Power 220 Volt*
- *15 Analog input*
- *20 Digital input*
- *6 Analog output 0 to 10 volt*
- *2 Input for 4 silo weigher or 1 batch weigher*
- *4 Input for bird weigher*
- *16 Dry change over contact relay 220V/2 A*
- *Expandable with module of 8 relay up to 96 output*
- *Temperature measurement of 0.1 C /1 F*
