

TEMPTRON 607

A LOW COST 8 STAGE CLIMATE CONTROLLER FOR TUNNEL VENTILATION

Temptron 607 climate controllers are reliable, user friendly micro controllers especially designed for poultry and swine raising.

Temptron 607 displays the temperature from up to 4 temperature sensors as well as the average house temperature. A humidity sensor can also be connected to the system.

Temptron 607 has 8 built in relays for operating fans, heaters, inlets, curtains and alarm relay; 2 0-10V outputs for use with variable speed fans and heating units and two digital inputs for water and feed measurement.

An automatic temperature reduction graph can be incorporated. Central management from a Windows enabled PC is done using the Web Chick package.

Can be ordered in various standard versions or as an OEM product with custom designed program.

- * Tunnel ventilation
- * Power fan ventilation
- * Natural ventilation
