

Digital Incubator Thermometer

Compact, easy to read and extremely accurate digital incubation thermometer. Discriminates to 100th of a °C and accurate to +/-0.1°C at 37.5°C, compare that to most types available! Covers the range 32 to 42°C and includes a remote sensor allowing the display to be outside the incubator. Operates from watch-type battery (included) which lasts about 8 months continuous use.
