

F10SC Veterinary Disinfectant Concentrate

200mL

F10SC Veterinary Disinfectant disinfects incubators, cages, bowls, floors, racks, shelving, perches and toys.

F10SC veterinary disinfectant concentrate is used by leading zoological parks, bird parks, avian, reptile and exotic pet breeders.

F10 is non-corrosive, non-toxic, non-irritating, biodegradable and has no adverse effects on people, animals, equipment or surfaces. It has been proven effective at recommended concentrations against all types of bacteria, fungi and spores including MRSA, avian influenza, psittacine beak and feather disease, canine parvovirus, e.coli, aspergillus and others.

F10SC can also be applied as a fog or fine spray to mist rooms to eradicate airborne microbes and to stop cross contamination.

F10SC is active against bacteria, fungi and spores. It is an excellent product for achieving a high level of biosecurity and poses no hazard to yourself or your animals when used at recommended concentrations.

F10SC can be sprayed on and left to disinfect after cleaning with no need to rinse off. The recommended dilution rates of F10SC are:

General disinfection: 1:500 (2 mL in 1 liter of water)

Against bacteria, fungi and most viruses: 1:250 (4 mL to 1 liter of water)

Against the most resistant viruses such as Parvovirus or PBFD: 1:125 (8 mL in 1 liter or water)

Available: 200mL, 1L, 5L
