High Intensity LED Egg Candler

Lyon's newest High Intensity LED Candler sets the bar even higher for the most lightweight, most efficient professional candler yet! Designed with a custom beam that uses a specific light spectrum and intensity for the unique environment of specialty eggs. Field-tested by leading zoo's, labs and wildlife conservation organisations, this light gives maximum penetration of dark, mottled and exotic eggs while dramatically reducing weight, noise and heat associated with other candler brands. Comes with a power supply, sturdy stand, and an adapter slides for focusing the light beam for various size eggs.
