NEKTON-DOG-VM Vitamin / Mineral supplement for dogs

Vitamins, minerals and trace elements count among the essential active substances for dogs - which are not formed by the body, or not able to be formed in a sufficient amount. Therefore, they always have to be supplied via the feed. All ingredients that are contained in NEKTON-Dog-VM have been specially adjusted to the dog's needs. NEKTON-Dog-VM protects against diet-related deficiencies and supports a controlled metabolism. A highly-effective basic compound for optimal vitamin and mineral supply for the dog. No other vitamin compound should be administered whilst using NEKTON-Dog-VM.
