

Sugar Glider

NEKTON-SUGAR GLIDER SUPPLEMENTARY FEED FOR SUGAR GLIDERS

Contains 18 amino acids

A special supplementary feed rich in vitamins and minerals aligned towards this animal's needs. It is important to pay attention to a balanced diet. That can turn out to be difficult, as sugar gliders can be very selective.

They tend to develop a liking towards their favourite food. This can vary from day to day, with everything else then being ignored. Then all your efforts to supply your sugar glider with a balanced diet can be in vain and your choice of important nutritional supplements becomes guesswork. This is why NEKTON has developed a supplementary feed for sugar gliders.
