## NEKTON-MULTI-REP

Vitamin and mineral supplement for all reptiles, ideal for reptiles with carapaces.

NEKTON-Multi-Rep contains 12 vitamins, 9 amino acids and 7 trace elements. NEKTON-Multi-Rep has been developed in accordance with the latest scientific findings and ensures the animal's basic health care. NEKTON-Multi-Rep encourages stable construction and maintenance of the skeletal system, as well as the animal's healthy growth. Signs of paralysis, such as e.g. legs tightening, are prevented by regularly administering NEKTON-Multi-Rep. Thanks for a low vitamin A concentration, this compound is particularly suited for armor-shelled reptiles and amphibians. A well-balanced ratio of calcium and phosphorous ensures a solid bone structure. To prevent and balance nutritional deficiencies and its secondary diseases, NEKTON-Multi-Rep should be supplied at least 1 x per week. No other vitamin compound should be administered whilst using NEKTON-Multi-Rep.
