NEKTON-REP-COLOUR

Multi-vitamin compound with colour intensifier for reptiles and amphibians.
Prevents skin colours from fading and brings out faded colours again.

The composition and effect of NEKTON-Rep-Color matches that of NEKTON-Rep, with additional colorants to prevent the color of the reptile fading or to achieve a more intense color.

NEKTON-Rep-Color is a high-quality multi-vitamin compound that matches NEKTON-Rep in its composition, and additionally contains canthaxanthin and apocarotenal. These substances are responsible for coloring the body, among other things and are deposited evenly in fatty tissue, shells and/or skin by administering NEKTON-Rep-Color.

NEKTON-Rep is soluble in cold water and is easily administered in drinking water, or as a powder via the live feed.
