

Portable Brooder

Aluminium Alloy

(In-vehicle Use)

Specially manufactured to maintain - by simple operation - the best condition during transportation of eggs or chicks, as well as being particularly suitable as an emergency unit in case of faults or malfunctions of incubators, hatchers or weaning chambers.

Made of light anodised aluminium alloy for full protection against corrosion and for easy cleaning. The brooder's light weight and handiness make transportation easy.

Temperature is adjustable. The machine can be powered at 12v low voltage (vehicle) and optionally 220v single-phase.

Power Supply : 220-230v / 50-60Hz
12v (vehicle)

Power Consumption : 60 watt

Net Weight : 6.5kg

Dimensions : 250 x 252 x 265 H (mm)

Internal Dimensions : 240 x 245 x 215 H (mm)
