

# FISHJECTOR 0.2

Designed for the Aquaculture industry.

## **EFFICIENT**

- The Fishjector 0.2 has a Fixed Dose of 0.2ml for the vaccination and injection of fish.
- Factory set using digital calibration ensuring doses are consistent and accurate.

## **DURABLE**

- Robust chrome plated brass syringe is easy to maintain and will last many years if maintained correctly.

## **COMFORTABLE**

- Our injection syringe is comfortable to handle with its ergonomic design and extended forward facing trigger.
- Allows for long sessions while minimising vaccinator-fatigue, the and PVC handgrip ensures easy handling.

The hand-operated reusable syringe has been designed for use with all oil and water-based vaccines.

Comes with rear PVC tubing feed and vaccine feed needle.
