**Watch your eggs hatch,
*every time...***

The Brinsea Mini incubator is a small, high quality, low cost, egg incubator combining ease of use, performance and exceptional value.

The two versions of the Mini give a choice of convenience, sophistication and price but both provide the essential environmental control necessary for successful egg hatching.

The clear walls of the egg chamber mean fantastic visibility of the hatching eggs without lifting the lid and the fan-assisted design coupled with detailed airflow analysis results exceptionally even heating of the eggs.

Mini Eco & Mini Advance Specifications

Comparison	ADV	ECO
High quality high visibility cabinet	✓	✓
Fan assisted airflow	✓	✓
Glass thermometer	—	✓
Digital display of temperature	✓	—
Automatic egg turning with autostop	✓	—
Countdown to hatch	✓	—
Temperature alarms	✓	—
2 year guarantee	✓	✓

Maximum egg capacities (approx.)

Quail	12	24
Pheasant	12	12
Hen	7	10
Duck	7	8

Technical Specification

Weight:	Eco – 0.85Kg (1.9lbs) Advance – 0.95Kg (2.1lbs)
Power consumption:	18 Watts max, 12 Watts typical average
Dimensions:	165 x 222mm (6.5" x 8")
Electrical supply:	220/240V 50Hz or 115V 60Hz as specified

The Brinsea Mini Eco and Mini Advance incubators are designed to use for the education of children although they are not toys and should be used only under adult supervision.

In order that we continue our policy of innovation and improvement we reserve the right to alter the specification without notice.

The **Mini Eco** holds 10 hens eggs (or equivalent) and provides the fine temperature control to ensure consistent and reliable hatches. Temperature is monitored on a purpose built liquid-in-glass thermometer and although factory set, the electronic temperature control allows fine tuning of the temperature setting if required.

The **Mini Advance** version provides automatic egg turning with autostop 2 days prior to hatching, countdown to date-of-hatch and temperature alarms on its digital display so you'll always know the status of your hatch. Eggs are turned by rotating egg disks. Two disks are available, one for 7 eggs of all sizes up to duck (supplied as standard) with a second small egg disk holding 12 eggs up to the size of pheasant available as an optional extra. Humidity is provided for with central water reservoirs in both models and both operate at low voltage (from mains adapters supplied) for safety.

Advance control system

The Brinsea Mini Advance incorporates digital micro-control which allows the user to manage incubator functions via a simple menu on the digital display. In normal operation the display shows incubation temperature, days to hatch and turning status. Opening the menu allows the user to adjust incubation temperature, the unit ($^{\circ}\text{C}$ or $^{\circ}\text{F}$), turning interval, turning angle, number of days your eggs take to hatch and high and low temperature alarm limits.

Guarantee

All Brinsea incubators are fully guaranteed and will be repaired or replaced if a fault should arise within the guarantee period (See terms of guarantee). Brinsea Products Ltd and their agents will not be responsible for loss of eggs in the event of failure, however caused, and the user is advised to arrange his own insurance cover where loss of power, mechanical or electrical failure might result in unacceptable losses.
